Damien is a Junior Associate at Altix. His MBA and bachelors in IT background coupled with his professional background offers experience in database management, database development, data analysis, and customer relationships and satisfaction.

He holds a strong interest in business intelligence and resource management solutions. Through studies at Polytech Lyon, a French engineering university, he developed strong logical-thinking capabilities which allows him to build complex data-based solutions. Damien has the ability to think both introspectively and retrospectively to identify areas of improvement and provide the optimal deliverable.

Thanks to his experience has a Division 1 All-American student-athlete competing in Decathlons, he developed a work ethic based on consistency, versatility and resiliency.

Damien graduated with a bachelor degree in IT - Software and Application Development and a Masters in Business Administration, both from the University of Cincinnati. He is fluent in English and French.

Outside of work, Damien enjoys cooking, discovering new places, live music, traveling, and spending time with his close ones.
