- Executive and Leadership Coaching

Wilson specializes in supply chain, operations management and growing individual and organizational capabilities. He brings years of individual and organizational building capabilities in End-to-End Supply Design, Operations Management and Execution, Integrated Business Planning and Commercial Innovation. Through his career, Wilson led and managed regional and global supply chain innovation in Latin America, Asia, Europe, Middle East and Africa and North America driving revenue and profit through service improvements, cost elimination and cash target delivery. He is passionate about seeing individuals and organizations grow skills to achieve their personal and professional goals.

Wilson led the development, execution and deployment of 5 Years Corporate plan including strategies, objectives, goals and milestones through a combined multi-functional team for Food and Consumer Goods industry.

He has led complex multi-business units Integrated Business Planning processes with a \$1B in revenues delivering improved customer service, inventory reduction, go-to-market initiatives delivered on time and at cost while merging two equal size business units on business Unit President.

He has also led supply chain redesign, expansion, and productivity projects of business units resulting in improved service, cost reductions and best customer service. This work ranged from starting new suppliers, expanding or consolidating manufacturing and distribution centers, and integrating business planning systems.

Developed and led multiple Regional and Global leadership and supply chain developmental programs including Global 3PL Sourcing Strategies, Fundamentals of Physical Distribution, and Recruiting and Supply Network Operations Manager Leadership Programs.
